EDUCATION

M.Sc Artificial Intelligence and Machine Learning, Coimbatore Institute of Technology July, 2019 - May, 2024
CGPA: 9.28 (Till Sem 7)

HSC, Suguna RIP V School
Percentage: 88%

June, 2018 - March, 2019

SKILLS

Programming Languages	Intermediate - C, Python. Beginner - Java, R, MATLAB
Database	MySQL, PostgreSQL, MongoDB, ChromaDB
Frameworks	Scikit-Learn, TensorFlow, PyTorch, LangChain, RiverML, OpenCV, Flask
Tools	Git, Trello, PowerBI

EXPERIENCE

ML Research Intern Bosch Global Software	July, 2022 - Dec, 2022 <i>Coimbatore, India</i>
--	--

- Designed and executed a centralized database solution, seamlessly integrating diverse data sources, culminating in a 30% reduction in data retrieval time and empowerment of real-time analytics
- Engineered an Incremental Machine Learning tool achieving 93% accuracy in analyzing and identifying errors within log files
- Performed a comprehensive comparative analysis on Zero-Shot Learning, Incremental Learning, Topic Modeling, and PreTrained NLP algorithms, resulting in an accuracy enhancement of 3-5%

AI and DS Intern SeaportAI	Oct, 2021, - Nov 2021 <i>Chennai, India</i>
--------------------------------------	--

- Automated Machine Learning models employing VertexAI workbench and improved the detection rate by 15%.
- Conducted an exhaustive comparison of diverse outlier detection algorithms and packages to assess their performance and suitability for the task

PROJECTS

Resume-Job Matching Tool. Built an API tool that matches a resume to a given job description and gives a match percentage, using LangChain, ChromaDB, and LLM (OpenAI GPT-3.5). [GitHub](#)

Crypto Market Sentiment and Price Prediction. Developed an API that measures keyword sentiment from Google News and Twitter using HuggingFace Transformers and integrated sentiment score with market insights to predict Cryptocurrency prices to offer trading guidance within \$20-25 range. [GitHub](#)

ASL Sign Prediction. Developed a CNN model for predicting displayed ASL (American Sign Language) signs, leveraging the Sign Language MNIST dataset for training and evaluation, yielding 95% accuracy. [GitHub](#)

ACHIEVEMENTS

- Published our project titled "[Personality Prediction Based on Twitter Tweets](#)" with 81% accuracy in finding MBTI type as a paper in Springer Book series, "[Algorithms for Intelligent Systems](#)"
- The project, "[Enhancing Intrusion Detection Systems using Hybrid Optimization Approaches](#)" got published in the [GRENZE International Journal of Engineering and Technology](#), showcasing an accuracy of 96.08% and a low False Positive Rate of 0.65%

OTHER WORKS

Engaged in freelance work on [Upwork](#), successfully delivering multiple client projects across various domains. Finetuned a HuggingFace Transformer model, [CryptoBERT](#) that has over 2 Lakh lifetime downloads. Played an integral role in organizing the Melinia 2023 Open Expo, guiding teams in the development of their projects.
